

HOMECARE BED BUYING GUIDE

Choosing the right bed is one of the most important steps in ensuring safety, comfort, and independence for older adults at home.

Considerations:

- Physical needs (mobility, medical conditions, incontinence, pressure care)
- Caregiver needs (is help needed getting in/out of bed?)
- Bed height and accessibility
- Bedroom space and setup

Frequently Asked Questions:

Q: What safety features are included in Icare's Homecare Beds

A: Safety is paramount when choosing a home hospital bed; that's why all our adjustable models come with lockable heavy-duty castors, soft touch upholstered surround panels, battery backup, and a backlit wipeable hand piece with intuitive controls for night use. For caregivers, these safety-focused designs reduce risks and provide confidence in daily routines.

🗣️ *Bed is great. My wife has MS it makes easy to take care of her. Thanks. | Jack, Arizona*

🗣️ *The adjustability and accessories of the IC333 bed assisted my father to be as independent for as long as possible and also my clients and made providing care in bed easier with the height adjustability. | Anelka, Australia*
